FOREWORD

This is the twelfth Crime and Justice Annual Report prepared by the Division of Criminal Justice Services pursuant to Sections 837, 837-a, and 837-b of the Executive Law.

The Division appreciates the cooperation and support of the nearly 600 police departments, sheriffs' offices and specialized police agencies that provide offense and arrest data for the report. We also wish to express our gratitude to District Attorney and Special Prosecutor offices throughout the State for their continued cooperation and assistance in providing data on the processing of felons. The Division is also indebted to the Superintendent of the Division of State Police, the Chairman of the Board of Parole, the Chairman of the Commission of Correction, the Commissioner of Correctional Services, the State Administrator of the Courts, the Chairman of the Crime Victims Board, the Director of the Division for Youth, and the Director of Probation and Correctional Alternatives for the data provided by their respective agencies. Without the concerted and dedicated efforts of the people who serve in the many local and State agencies which comprise our criminal justice system, the publication of this report would not be possible. It is these efforts which are documented in this Crime and Justice Annual Report.

The contributions of all involved in the preparation of this report permit the Division to provide a clear picture of the nature of crime and justice issues in New York State.

INTRODUCTION

The New York State Division of Criminal Justice Services was assigned the responsibility for the collection of data concerning crimes and arrests in New York State, effective January 1975, pursuant to Sections 837, 837-a and 837-b of the Executive Law. In assuming that responsibility, the Division was also committed to providing relevant data to the National Uniform Crime Reporting Program administered by the Federal Bureau of Investigation and to disseminating this information to the New York State criminal justice community.

This publication is the twelfth annual report produced in discharge of that responsibility.

Uniform Crime Reports submitted monthly by police agencies in New York State are the basis for much of the material contained in this report. These reports include information on Part I Offenses, Part II Offenses, location and time of the Offense, value of property stolen, Part I Arrests, Part II Arrests, Law Enforcement Officers Killed or Assaulted and Number of Law Enforcement Employees.

- In 1986, all 567 enforcement agencies participated in the Uniform Crime Reporting Program and agencies with multi-county jurisdictions reported separately of each county within their jurisdiction.

- Police agencies also submit supplementary reports on homicide and arson offenses. These detailed reports allow for a more in-depth analysis of these serious crimes.

In addition to the Uniform Crime Reporting data contained in this report, we have provided data on felony arrests, felony drug arrests, and felony indictments and dispositions.

- The arrest material is derived from the Computerized Criminal History (CCH), which is based on the arrest fingerprint cards submitted to the Division of Criminal Justice Services in compliance with Section 160.20 of the Criminal Procedure Law. Adult felony and misdemeanor arrests are presented for each county from 1981 through 1986.

The felony indictment and disposition material is reported by District Attorneys and Special Prosecutors throughout the State pursuant to Section 837-a of the Executive Law. This material includes data on felony indictments, felony drug indictments, felony dispositions and median time from indictment through disposition.

- Information from other criminal justice agencies is included in this report to present, in one volume, as much information as possible about the criminal justice system.

  Agencies that have submitted data and are included in this report are:

  Office of Court Administration
  Division of Probation & Correctional Alternatives
  Department of Correctional Services
  Commission of Correction
  Division of Parole
  Division for Youth
  Crime Victims Board

For many reasons, not all offenses come to the attention of the police. Victims may feel too embarrassed to report a crime or that the loss sustained was too small to report or believe that there is nothing the police can do. Victimization studies have confirmed that many offenses are never reported.

When an offense is cleared, it is usually done by one or more arrests. However, there are exceptional circumstances when an offense may be cleared without an arrest. Exceptional clearances result when the police know who and where the offender is and have enough evidence to support an arrest, but are prevented from doing so because of some reason outside of their control.

The UCR data included in this report are divided into seven main segments:

PART I OFFENSES

1. Criminal Homicide
   a. Murder and Non-negligent Manslaughter
   *b. Negligent Manslaughter
2. Forcible Rape
3. Robbery
4. Aggravated Assault
5. Burglary
6. Larceny
7. Motor Vehicle Theft

*All of the above, with the exception of 1-b, Negligent Manslaughter comprise the "Crime Index," which is used to measure the relative extent of crime, nationwide, and to show trends in crime.

This report also provides greater detail regarding the following aspects of Part I Offenses:

a. Type of Weapon/Force Used
b. Type of Location in which the Crime was Committed
c. Number of Offenses Cleared
d. Type and Amount of Property Stolen and Recovered

PART II OFFENSES

8. Arson (Commercial, Residential or Motor Vehicle)
9. Kidnaping
10. Controlled Substance Sale/Manufacture - Opium, Cocaine, Derivatives, Marijuana, Synthetic Narcotics and Other Dangerous Drugs.

AGE, SEX, RACE AND ETHNIC ORIGINS OF PERSONS ARRESTED

1. Persons Under 16 Years of Age (Juvenile)
2. Persons 16 Years of Age and Over (Adults)

The arrest reports reflect the number of persons arrested for Part I and Part II Offenses, as described above.

- Note: The FBI/UCR Program treats persons under 18 as juveniles, and requires that they be so reported. This Report, however, is compiled in accordance with New York State Law which classifies juveniles as those persons under 16 and adults as those 16 and over.

LAW ENFORCEMENT OFFICERS KILLED OR ASSAULTED

- Statistics are provided on the number of New York State Law Enforcement Officers Killed or Assaulted. A description of the conditions under which the officers were assaulted is also provided.

HOMICIDE ANALYSIS

- Detail on homicides committed in New York State, including characteristics of victims and circumstances under which such homicides occurred,are provided.

ARSON ANALYSIS

- This report provides additional detail concerning arson. The analysis describes the types of structures involved, distribution of activity and clearance rates.

DOMESTIC VIOLENCE

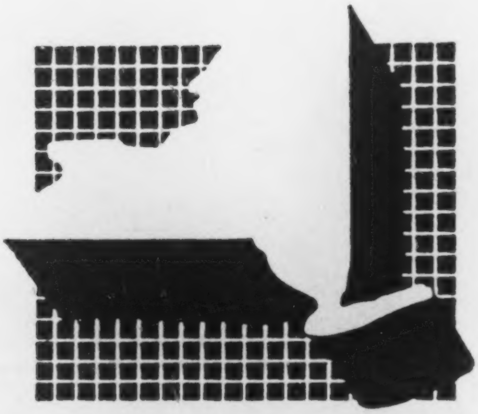
- Statistics are presented relating to the incidence of Domestic Violence in New York State. The statistics are presented by geographic locations of New York City, Suburban Counties and Upstate Counties.

To combat crime effectively, it must be known when and where crime is occurring. The county, as a crime location, is not sufficiently definitive. Therefore, we have instituted direct reporting to the State program from every Police Chief and Sheriff in New York State in accordance with State Law.

It is important to note that without the collaboration of the Law Enforcement Agencies and cooperation of the criminal justice agencies, this Report would not be possible.

POPULATION DATA SOURCE

Population data used for calculating crime rates for the 1986 Crime And Justice Annual Report are based on 1980 census data and updates provided by the United States Department of Commerce - Bureau of Census and the New York State Department of Commerce.



THE PROBLEM

OFFENSES - PART I AND PART II
HOMICIDE

DOMESTIC VIOLENCE

OFFENSES

For over 50 years criminal offenses have been used as a crime index to assess the level of criminal activity within an area. The index offenses were selected because of their seriousness or frequency of occurrence.

The index offenses are murder & non-negligent manslaughter, forcible rape, robbery, aggravated assault, burglary, larceny and motor vehicle theft.

Comparisons of crime rates between police agencies or counties should be made with extreme caution. The crime rates published in this report are based solely on offenses reported or known to the police and the size of the resident population. Additional factors which may influence crime rates are density of population, geographic location, social attitudes, economic conditions, number of law enforcement officers, seasonal and transient populations, and rural or urban environments.

INDEX OFFENSES

- Index offenses increased 3.1 percent in New York State from 1985 to 1986.

VIOLENT OFFENSES

HOMICIDE

The Offenses[1]

Table 1 presents data on homicides by month and area for New York State from 1982 through 1986. There were 1,936 homicides during 1986.[2] There were 246 more homicides in 1986 than in 1985, an increase of 14.6 percent. In 1986, New York State's homicide rate of 10.7 per 100,000 inhabitants was the eleventh highest among the fifty states.[3]

Not all areas of the State reported an increase in homicides.[4] New York City experienced a 16.1 percent increase from the previous year. The six MPA counties experienced an overall decline of 2.4 percent. The number of homicides for the remainder of the State increased by 28.9 percent.

The distribution of homicides by month throughout 1986 was relatively consistent. The fewest number of homicides for the year occurred during February with 138 (7.1 percent) and the largest number occurred during January with 180 (9.3 percent) (Table 1). Excluding these two months, the range for the remaining ten months was rather narrow - from a high of 173 to a low of 147.

---

[1] The Homicides discussed in this chapter were all those reported through the Supplementary Homicide Reporting system from New York State law enforcement agencies for 1986. The number of homicides in this chapter are higher than those reported in the Uniform Crime Reports (UCR). The UCR system provides for the deletion of cases from the current year when cases originally reported in prior years have been later determined to be false or baseless (unfounded).

[2] A homicide offense was counted for each victim of a homicide event. For example, if two persons were killed by three offenders during a robbery, this was counted as two homicide offenses.

[3] Federal Bureau of Investigation, Crime in the United States 1986, (Washington, D.C.: U.S. Department of Justice, 1986).

[4] The regional groups used in this report are: New York City, consisting of the five boroughs of the city (Bronx, Manhattan, Kings, Queens, and Richmond); Other Metropolitan Planning Areas (MPAs), consisting of the six largest counties outside New York City (Erie, Monroe, Nassau, Onondaga, Suffolk, and Westchester); and Other Areas, consisting of the remaining counties.

Homicide was largely a New York City problem. While New York City contained approximately 40 percent of the State's population[5], it accounted for the bulk of the homicides (83.1 percent). The remaining homicides were distributed throughout the MPAs (10.4 percent) and the Other Areas (6.5 percent) (Table 1).

Table 2 presents data relating to characteristics of the homicide event, including: victim-offender relationship, circumstances, number of victims and offenders, location,[6] and weapon use. Reporting agencies were able to discern the victim-offender relationship in 46.4 percent of the homicides. Of these, 71.2 percent were committed by offenders who were considered to be non-strangers. The number of homicides committed by non-strangers increased from the previous year by .5 percent.[7] Homicides usually did not occur in conjunction with another felony, but as the result of an altercation or other circumstance (67.2 percent). Approximately 33 percent of the homicides were related to another felony, and in such cases, the related felony was usually a robbery (43.4 percent).

The vast majority of homicide events resulted in the death of a single victim. Of these single victim offenses, 46.7 percent were killed by a single offender; 10.9 percent were killed by two or more offenders; and 42.5 percent were killed by an unknown number of offenders. For homicides where the number of offenders was known, 74.3 percent consisted of a single victim and a single offender. Of all homicides, 11.1 percent resulted from the action of two or more offenders (Table 2).

---

[5] Bureau of the Census, 1980 Census of Population and Housing: New York, Final Population and Housing Unit Counts, (Washington, D.C.: U.S. Department of Commerce, 1981).

[6] The location indicator had two values: outside and inside. Outside was defined as a location potentially observable by a police officer on routine patrol. Inside was any other location.

[7] These percentages were based only on homicide cases for which the victim-offender relationship was known. It is reasonable to believe that homicides by strangers were less likely to be solved (and therefore to be included in these percentages), thus underestimating the true percentage of victims killed by strangers. If this selection effect remained relatively constant over the years, it would not invalidate comparisons with respect to the percentage distributions across the years.

Homicides were more likely to occur inside (56 percent) than outside (44 percent). A firearm was the most common weapon (54.0 percent). When a firearm was used, it was almost always a handgun. Next in frequency of use were cutting or stabbing instruments (24.5 percent), followed by personal weapons such as hands and feet (14.7 percent) (Table 2).

Table 3 shows that in addition to contributing disproportionately to the number of homicide cases in the State, New York City's homicides were consistently different from the homicides in the MPAs and the Other Areas. New York City homicides were: more likely to involve multiple offenders; more likely to involve a firearm; and more likely to occur as part of a robbery. New York City homicide victims were on the average three years younger than victims outside of New York City. New York City homicide victims were also more likely to be male. New York City offenders were the same age as their counterparts outside New York City. They were just slightly more likely to be male in New York City (90.8 percent compared to 88.4 percent in the rest of the state).

The Victims

More than one-half of all homicide victims were 20 to 39 years old. Most were male. Of homicide victims, 50.3 percent were in the white racial category and 47.5 percent were black. Male victims outnumber female victims by a ratio of nearly 4 to 1 (Table 5).

Victim Sex Both males and females were usually killed by a single offender, although this percentage was higher for females than for males. Males were usually killed with a firearm and, similar to the previous year, usually by a non-stranger. Females were also usually killed by a non-stranger. The weapons used to kill female victims were more evenly distributed than they were for males: firearms (34.1 percent); cutting, stabbing, and bludgeoning instruments (32.5 percent); and personal weapons (25.9 percent). Homicides involving female victims suggested a stronger relationship to domestic violence then did homicides in which the victim was a male (Table 9).

Victim Race There was little relationship between the race of the victim and the weapon used. Slightly over one-half of both blacks and whites were killed with a firearm. There was a stronger relationship between race and the victim-offender relationship. Black victims were more likely to be killed by a non-stranger (79.0 percent) than were white victims (66.0 percent). In terms of circumstances of the homicide, the killings of white victims were related to another felony in 39.1 percent of the cases compared to 28.1 percent for black victims (Table 10).

Age Interactions The distribution of homicide victims among the sex and race categories differed by victim age. While the overall percentage of female victims was 20.7 percent, the percentage of females was substantially higher in the extreme age groups: 43.4 percent among victims under ten years of age and 42.1 percent among victims sixty years of age or older (Table 7).

The distribution of homicides among racial categories also differed by victim age.[8] Overall, there were 106 white victims for every 100 black victims. This represents an average ratio for all age groups (Table 7).

The characteristics surrounding the killing of very young victims suggested that they usually died in familial settings. The very young were almost always killed by a single offender, a non-stranger, inside and under circumstances unrelated to a felony. They usually died as the result of a beating (Table 8).

The killing of persons 10 years of age and older proved to be more difficult to characterize. These victims were similar in that they were usually slain by a single offender 80.5 percent of the time. While persons in the 10 to 59 age group were usually killed with a firearm, the weapons used to kill elderly victims were distributed among: firearms (16.8 percent); cutting, stabbing, bludgeoning instruments (42.4 percent); and personal weapons (35.2 percent). Persons in both age groups were equally likely to be killed by strangers. The 10 to 59 age group and the 60 and over age group differed with respect to the circumstances and location of the homicide. The 10-59 age group was similar to the very young in being most likely to be killed during altercations and other circumstances, while the elderly were most likely to be killed in connection with another felony. The deaths in the 10-59 age group were evenly divided between inside and outside locations. However, the elderly, like the very young, were most likely to be killed at an inside location. These similarities and differences in the characteristics of the homicides for these three age groups may be a result of the effect age has on how, where and when persons spend their time.[9] The very young and the elderly spend more of their time indoors than the 10-59 age group. While both spend a great deal of time indoors, only the elderly are logical targets of felony related homicides, such as robbery (Table 8).

---

[8] Racial categories other than black and white have been excluded to simplify the presentation.

[9] Hindelang, Michael J., Michael R. Gottfredson, and James Garofalo. *Victims of Personal Crime: An Empirical Foundation for a Theory of Personal Victimization*. (Cambridge, Mass.: Ballinger, 1978).

The Offenders[10]

As was true for victims, the vast majority of homicide offenders were males. Offenders were more likely to be black than white (52.8 percent versus 45.3 percent). Offenders, on the average, were younger than victims (Table 11).

The propensity for homicide to be a group activity was greatest among offenders under twenty years of age and declined sharply with age. This was also true for the percentage of homicides which were felony connected. Weapon use did not appear to be strongly related to offender age. Homicides by those over 60 years of age were strongly suggestive of "indoor" rather than "street" violence: only one occurred in connection with another felony; all but two were by a single offender; all offenders knew their victims; and most occurred inside (Table 14).

A higher percentage of female offenders were black (64.0) than they were white (35.3) (Table 15).

Males were more likely than females to have killed using a firearm; more often to have killed a stranger; more often to have killed in connection with another felony; and at an outside location. The victims of female offenders were predominantly non-strangers (89.9 percent) (Table 16).

There were very few differences between black and white offenders with respect to the number of offenders involved or the type of weapon used. For both racial groups, killings usually grew out of altercations and other circumstances (Table 17).

In the aggregate, it appeared that homicide offenders clearly victimized members of their own race. Approximately 87 percent of the white offenders killed white victims, while approximately 78 percent of the black offenders killed black victims (Table 18).

Overall, there was a tendency for offenders to victimize persons of a similar age to themselves (Table 19).

---

[10] The characteristics of offenders were not known in all cases. The percentages on the characteristics of homicide offenders were based only on those cases where offender characteristics were known and reported. The total number of offenders is a minimum estimate, because of the assumption that all victims killed by an unknown offender were killed by a single offender. There are more reported offenders than victims because several offenders sometimes participated in the killing of a single victim.

Summary

These data on 1986 homicides showed strong similarities with data from prior years: the vast majority of homicides occurred in New York City; males predominated both as offenders and as victims; and there were relatively few interracial killings. A majority involved the use of firearms, especially handguns.

Victim age had a strong relationship to the type of homicide. The very young, being physically vulnerable and largely confined to the home, were primarily victims of their parent's violence. victims 10 through 59 years of age were more subject to slayings at outside locations and during altercations and other circumstances. The elderly were most likely to be killed at an inside location during the commission of another felony, such as a robbery.

ARSON

This is the eighth analysis of arsons in New York State to be presented in the Crime and Justice Annual Report. The data for these analyses are derived from a supplementary arson data collection program begun in 1979 under the Uniform Crime Reporting (UCR) System.

- Arson is defined by the Uniform Crime Reporting Program as a "willful or malicious burning, or attempted burning, of a dwelling house, public building, motor vehicle, aircraft, or personal property of another." Only fires determined through investigation to have been willfully or maliciously set are classified as arsons.
- A "cleared" arson incident is defined as an offense for which a perpetrator has been taken into custody or is otherwise known by police to have committed the crime, but for reasons outside police control cannot be taken into custody.

Arsons reported under Part II of the UCR program and shown elsewhere in this volume are reported under the "hierarchy rule," whereby an offense is counted only if it is the most serious in an incident. Under this program, an arson offense is reported regardless of whether it occurred in conjunction with a more serious offense. This analysis, therefore, shows more arson offenses than are shown for arson offenses in the UCR Part II offense presentations.

Type of property is divided into three categories:

- structural (residential, commercial, public/community, and other);
- mobile (motor vehicle and other);
- other property.

The definitions of property type are as follows:

SINGLE OCCUPANCY RESIDENTIAL

includes houses, townhouses and duplexes.

OTHER RESIDENTIAL

includes apartments, tenements, flats, hotels, motels, inns, dormitories and boarding houses.

STORAGE

includes warehouses, garages and barns.

INDUSTRIAL/MANUFACTURING

includes factories and all other manufacturing facilities.

OTHER COMMERCIAL

includes stores, restaurants and offices.

PUBLIC/COMMUNITY

includes churches, jails, schools, colleges and hospitals.

ALL OTHER STRUCTURES

includes out-buildings, monuments and structures under construction.

MOTOR VEHICLES

includes automobiles, trucks, buses, motorcycles, motor scooters, and snowmobiles.

OTHER MOBILE

includes airplanes, boats, trailers, and recreational vehicles.

OTHER PROPERTY

includes crops, timber, fences, and signs.

Estimated values of property damaged are included in the report. They are included in order to provide an estimate of the absolute minimum dollar value. Because many police departments have little or no access to dollar amounts for arson, the monetary values for many arson cases are not reported.

ARSONS REPORTED

- There were 11,411 arson incidents reported in New York State in 1986, a 4.3 percent decrease from 1985. Of these incidents, 59.5 percent occurred in New York City, with the other 40.5 percent occurring in the counties outside New York City.

- Arsons of structures accounted for 66.9 percent of all arson incidents in New York State. Of these, 45.6 percent were residential arsons. In New York City, structural arsons accounted for 70.9 percent of all arsons reported, while Upstate structural fires accounted for 61.0 percent of all arsons. Consistent with data from previous years, residential structure arsons remained the most common type of structural arson throughout the State. Examination of these residential structure arsons shows that 84.7 percent of all "other residential" arsons took place in New York City. Of the "single occupancy" arsons, 80.4 percent took place outside New York City, and constituted approximately 22.2 percent of the total arsons Upstate. Commercial structure arsons accounted for 15.1 percent of all arsons in New York State. A regional comparison shows that Upstate had a higher proportion of commercial structure arsons 18.1 percent than New York City (13.1 percent). "Other commercial" arsons, the most frequent form of commercial arson in New York State, accounted for 10.2 percent of the arsons statewide.

- In the mobile arson category, the 3,383 "motor vehicle" arsons reported in New York State accounted for 29.6 percent of of all arsons, while "other mobile" arsons accounted for 1.1 percent of all arsons. Almost 53 percent of the "motor vehicle" arsons occurred in New York City.

ABANDONED STRUCTURE ARSONS

- The 1,599 arsons that occurred in abandoned structures accounted for 14.0 percent of all arsons in New York State. In New York City, 15.2 percent of all arsons involved abandoned structures; such arsons accounted for 12.3 percent of Upstate arsons. Statewide, residential structures were the most common form of abandoned structures to be targets for arson, with the likelihood greater in New York City than in the rest of the State. Almost all arsons in the "other residential" category of abandoned structures (94.9 percent) occurred in New York City, while 31.2 percent of the arsons of "single occupancy" abandoned structures occurred there.

ARSONS CLEARED

- In 1986, 1,242 arson incidents were cleared in New York State. Of these, 76.5 percent were structure arsons, of which 49.9 percent were residential and 15.5 percent commercial.

- In New York City, clearances of residential arsons accounted for 63.6 percent of the total arsons cleared.

- Upstate clearances of residential arsons accounted for 44.0 percent of cleared arsons.

ARSON CLEARANCE RATES

- The 1986 clearance rate[1] for all arsons in New York State was 10.9 percent.

- The New York City clearance rate was 5.5 percent and the rate Upstate was 18.7 percent. This relatively low clearance rate seems to reflect the extreme difficulty in solving a crime in which most of the physical evidence is destroyed. Arson rates vary by the type of property involved. In 1986, statewide clearance rates for the "public/community" structural category had the highest clearance rate (20.1 percent). Motor vehicle arson had the lowest clearance rate (6.1 percent).

ARSONS CLEARED

INVOLVING PERSONS UNDER 18

- Three hundred ninety nine of the arson clearances involved persons under age 18. Persons in this age group accounted for 32.1 percent of all arson clearances in the State; this represents a slight decrease from 1985, when they accounted for 32.3 percent of the arson clearances. In New York City, 13.0 percent of the clearances involved persons "under 18", while Upstate it was 40.4 percent.

SUMMARY

- There were 11,411 arson incidents reported in New York State in 1986. Arsons in New York City accounted for 59.5 percent of these incidents. Statewide, 66.9 percent of the reported arsons were structure arsons; 45.6 percent were residential arsons; and 14.0 percent were arsons of abandoned structures. Clearance rates for arson incidents statewide averaged 10.9 percent. The clearance rates were 5.5 percent in New York City and 18.7 percent Upstate.

---

[1] The clearance rate is the ratio of clearances to the net number of arsons reported, expressed as a percent. Because a 1986 clearance does not necessarily reflect clearance of an offense reported in 1986, the clearance rate should be considered only as a general indicator of processing efficiency.

NEW YORK STATE
DOMESTIC VIOLENCE
1986

The Governor's Task Force on Domestic Violence was established by Executive Order #90 on May 17, 1979, to study "the traumatic effects of domestic violence and how our social and legal systems can better deal with such violence and its causes."

The Uniform Crime Reporting System (UCR) is utilized by DCJS as the data collection instrument for obtaining domestic violence data from the local law enforcement agencies. The domestic violence data reflected in this report are based on those offenses which have come to the attention of law enforcement officers, regardless of whether a formal complaint was filed or an arrest made.

For New York City, the 38,315 offenses reported in 1986 is a 65.6% increase over the 23,131 reported in 1985, while the Upstate counties increased 2.9%.

Statewide, domestic violence offenses reported increased. A total of 62,191 offenses were reported in 1986 as opposed to 46,337 reported in 1985, an increase of 34.2%. As in prior years, this increase is largely due to improved reporting by the law enforcement agencies across the State.

ARRESTS

Arrests in New York State during 1986 totaled 1,219,704, a 5.4 percent increase from the 1,156,943 arrests in 1985. Males accounted for 85.3 percent of those arrested and females, 14.7 percent.

Arrests for index offenses -- murder, non-negligent manslaughter, forcible rape, robbery, aggravated assault, burglary, larceny and motor vehicle theft -- increased from 169,850 in 1985 to 182,703, up 7.6 percent. In 1986, arrests for index offenses accounted for 15.0 percent of the New York State arrest total.

ADULT ARRESTS [1]

- A total of 1,139,866 adult arrests were reported in New York State in 1986.
- Adults sixteen through twenty-nine accounted for 67.3 percent of the adult arrest total and adults twenty-one and under made up 31.5 percent of the arrest total.

JUVENILE ARRESTS

- New York State reported a total of 79,838 juvenile arrests in 1986, 6.3 percent below the 85,214 reported in 1985.
- Males represented 81.7 percent of the juveniles arrested and females, 18.3 percent.
- Arrests for fifteen year olds accounted for 40.6 percent of the juveniles arrested and fourteen year olds represented an additional 25.4 percent.

NEW YORK CITY

- New York City reported 71.3 percent of all the arrests in New York State for 1986.
- The 47,511 juvenile arrests reported by New York City accounted for 59.5 percent of the state total.

DRUG ARRESTS

- Combined adult and juvenile drug arrests increased from 93,182 in 1985 to 101,566 in 1986, an increase of 9.0 percent.
- Arrests for marijuana accounted for 38 percent of the New York State drug arrests.
- Arrests for opium, cocaine and derivatives represented 53.6 percent of the drug arrests and showed a 53.7 percent increase from 1985 to 1986.

---

[1] Adults are persons sixteen years of age and older.

NOTE: Arrests include summonses for violation of local ordinances.

RACE AND ETHNIC ORIGIN

- Data on race and ethnic origin were estimated for 553,972 summonses reported from New York City. Existing forms do not provide for the reporting of racial and ethnic data for New York City summonses. Arrest categories that include these estimates are: marijuana use, criminal mischief, other gambling, liquor law violations, disorderly conduct, loitering and "all other offenses" category.

ADULT FELONY AND MISDEMEANOR ARRESTS

- A total of 172,153 felony adult arrests were reported in New York State in 1986, 13.8 percent above the 151,279 reported in 1985.
- New York City reported 71.5 percent of the total adult felony arrests in 1986 compared to 69.8 percent in 1985.
- New York State reported 283,934 adult misdemeanor arrests in 1986, a 5.0 percent increase over the 270,352 reported in 1985.
- New York City showed a 7.4 percent increase in adult misdemeanor arrests from 1985 to 1986 and represented 48.1 percent of the state total in 1986.

INDICTMENTS AND DISPOSITIONS

The following tables present data on felony indictments[1] and dispositions for 1986 and 1985. This information is obtained from a statistical reporting system based on individual reports of each indictment and each disposition submitted by district attorneys and special prosecutors throughout the State. The unit count in this reporting system is the defendant/indictment; that is:

- When several defendants are named in one proceeding or indictment, each defendant is counted separately; and
- When one defendant is named in multiple proceedings or indictments, each indictment is counted separately.

The use of offender-based statistics and the tracking of each defendant from time of indictment until final disposition makes possible the measuring of elapsed time between various stages in processing. The median time is obtained by ranking all the values in a specific category (for example, time from indictment to disposition) and choosing the middle number - that is, the number with an equal amount of values above and below it. As a result, the median values are not influenced by very large or very small numbers which can affect averages.

It should be noted that the disposition data reported in these tables pertain to cases handled during the specified year by the superior courts. These dispositions may be for indictments in the same or previous years.

[1] All data in this chapter are from the Caseload Activity Reporting System of the Unified Court System. Courts report data to the Office of Court Administration pursuant to the Rules of the Chief Administrator of the Courts (22 NYCRR 115).

[2] Parking ticket caseload activity was measured for the first time in 1985.

[3] Excludes Town and Village Courts. An estimated additional two million cases were filed and disposed in these courts in 1986 (data not yet available).

[a] The disposition figure is used as intake.

[b] Does not include dispositions in the Arbitration Program.

[c] The disposition figure is used as intake. This is the number of cases filed in which there was no answer, but in which a default judgment was entered. These cases were not calendared.

[d] Shown here for reference only and not included in totals. Recorded as intake in the civil courts listed immediately above.

[e] Surrogates' Court dispositions include orders signed, decrees signed and letters issued.

Criminal cases are processed in the trial courts as follows: Felony indictments and superior court informations are processed in the Criminal Term of the Supreme Court in New York City and in the County Courts outside of New York City. In several counties outside of New York City, a portion of the felony caseload is processed in the Supreme Court as well. The courts of limited jurisdiction - Criminal Court of the City of New York; District Courts of Nassau and Suffolk; and City, Town and Village Courts outside of New York City - have original jurisdiction over felonies and complete jurisdiction over misdemeanors, violations, and infractions.

Criminal Term of Supreme and County Courts

Filings: Statewide, 56,356 felony cases were filed in Supreme and County Courts during 1986.[4] This level of filings was an increase of 10% from the 51,036 filings in 1985. Sixty-three percent (35,758) of 1986 filings occurred in New York City.

Table 2-2 shows a breakdown of 1986 filings by judicial district. The greatest rates of increase were in the 11th (Queens) and 1st (New York) JDs. Filings in the 11th JD rose 28% from 5,752 in 1985 to 7,378 in 1986. Filings in the 1st JD rose 20% from 10,041 to 12,050.

Table 2-3 focuses on individual counties, ranking the sixteen counties with 400 or more felony-case filings. These sixteen counties accounted for 88% of all filings. New York County had the highest volume, with 12,050 filings. Kings, Queens, and Bronx followed.

Dispositions: Statewide, 55,497 cases reached disposition (guilty plea, trial verdict, dismissal, or other) in 1986, a nine percent increase from the 50,791 dispositions in 1985. Sixty-two percent (34,558) of the Statewide dispositions were in New York City.

Table 2-2 shows 1986 dispositions by judicial district. Dispositions in the 11th JD (Queens) increased 35% from 5,468 in 1985 to 7,391 in 1986. Dispositions in the 7th JD (Monroe and surrounding counties) increased 21% to 2,777 in 1986 from 2,291 in 1985. The 12th JD (Bronx) showed a 13% increase and the 2nd JD (Kings and Richmond counties) showed a 12% increase.

Criminal Courts of Limited Jurisdiction

Criminal Court of the City of New York: There were 301,635 arrest-case dockets filed in the Criminal Court of the City of New York in 1986. There were 276,280 dispositions in this period. These figures were increases of 10% in filings and 4% in dispositions compared with 1985.

Of the dispositions, 50% were by guilty plea, 29% by dismissal, 13% by referral to grand jury or transfers to Supreme Court for waiver of indictment, one-half of 1% by verdict, and 7% other dispositions. This distribution is nearly identical to that of 1985.

There were 123,712 summonses added to the calendar. (In addition, 298,595 summonses were filed to which defendants did not respond.) There were 121,057 dispositions.[5]

City and District Courts outside New York City: Criminal-case intake in the City Courts and the Nassau and Suffolk District Courts was 229,044 in 1986. The courts reported 217,713 dispositions. Of the dispositions, 54% were by guilty plea, 35% by dismissal, 6% by referral to grand jury, 2% by trial verdict, and 3% by other means.

There were 394,531 noncriminal (violations and infractions) Uniform Traffic Tickets disposed by judges in these courts. One-third (129,137) were guilty pleas and 2% (7,479) were trial verdicts. The balance were dismissed. In addition, the clerks' offices disposed of 142,658 tickets. These consisted primarily of fines paid (by personal appearance and mail) and bail forfeitures. In cities without Parking Violations Bureaus, the City and District Courts process parking tickets. There were 629,935 dispositions.

Figure 2-2 shows criminal caseload activity in the courts of limited jurisdiction.

DIVISION OF PROBATION AND CORRECTIONAL ALTERNATIVES

The New York State Division of Probation and Correctional Alternatives collects data on probation service delivery from local probation departments on a monthly basis and compiles it for annual totals. The following statistics for adult supervision were derived from the Probation Registrant System and for all other services, from the monthly reports of criminal and family workload in probation departments. Services other than adult supervision include: intake for family court, investigations conducted for family and criminal court, and predisposition supervision.

HIGHLIGHTS OF 1986
BASED ON
REPORTS OF WORKLOAD IN PROBATION DEPARTMENTS

INTAKE SERVICES

Cases opened for intake services decreased from 149,574 in 1985 to 146,747 in 1986. The 36,646 cases opened in New York City represents 25% of the state-wide total, compared to 26% in 1985. (chart 1)

INVESTIGATIONS

Probation departments conducted 94,727 regular investigations (pre-sentence, pre-plea, JD, and PINS), and 57,368 other investigations. This 152,095 total is a 2% increase over the 149,520 investigations conducted in 1985. (Table 1)

PRE-DISPOSITION SERVICE

There were 17,965 cases received for supervision prior to court disposition. This is a 6% increase over the 16,883 received in 1985. (chart 2)

PROBATION SUPERVISION

During 1986, there were 48,188 probation supervision cases received. This is a 5% increase over 1985, when 45,732 cases were received.

At the end of 1986, there were 144,766 cases under supervision, an increase of 6% over the 108,014 being supervised on 12/31/85. (Table 2, charts 3 and 4)

Under Custody Population (Exhibit 1 and 2)

The number of inmates under custody declined from 12,525 at the end of calendar year 1971 to a low of 12,444 at the close of 1972. This decline began in 1964 and continued over a nine year period. Contributing to this decline was the Baxtrom decision which led to the release from Department custody of all criminally insane inmates held beyond their maximum expiration dates along with related decisions which ended the practice of holding under custody dangerously mentally incapacitated persons for long periods of time. These decisions, coupled with other factors including a revised Penal Law which became effective in September of 1967, changes in sentencing procedures, and the development of major institutional programs for drug addicts by the state's drug control agency, resulted in an annual net loss in the under custody population which continued through 1971. This situation was reversed in 1973 when admissions exceeded releases for the first time since 1963. This rise in the under custody population has continued every year through 1986, when the under custody population rose to 38,647 (including 198 detained parolees), an increase of 210.6 percent over a fifteen year period. Reasons for this increase are discussed in the section on admissions.

Admissions to Department Custody

Admissions registered a steady rise from an annual total of 7,242 in 1971 to 10,272 in 1977. The number of admissions fell to 8,837 in 1978 but resumed an upward trend in 1979 reaching an all time high of 19,111 in 1986. A surge in the number of 1976 and 1977 admissions reflected efforts by the Office of Court Administration to reduce a large backlog of felony cases pending before the Supreme Court which resulted in a temporary acceleration of the already high and rising rate of court commitments. Similar efforts in subsequent years have contributed to a continued rise in commitments which reached an all time high of 14,919 in 1986. Court commitments account for eight of ten admissions and trends in this category largely shape the flow of offenders into State prisons. Court commitments declined to 4,250 in 1970. From this 1970 low, commitments have risen to the high of 14,919 in 1986, an increase of 251 percent. Beginning in 1971, felony commitments rose rapidly, offsetting declines in other types of commitments. Contributing to this trend has been a rise in felony arrests, indictments and court dispositions and an increasing tendency of the courts to commit convicted felons to state correctional facilities. Several more stringent laws enacted in 1973 and subsequent years have added to this increase in commitments. These include the Second Felony Offender Law, which has imposed mandatory indeterminate sentences on such offenders; a drug law which has imposed harsher penalties on drug offenders; and the law imposing mandatory indeterminate terms for all Class B felonies and for certain Class C and D felonies. The trend toward a high level of court commitments has continued through 1986 reflecting also the impact of the violent felony offender legislation which became effective in September 1978.

Releases from Department Custody (Exhibit 3)

Releases from DOCS custody remained relatively stable during the five year period, 1971-1975, averaging 7,285 annually. In 1976 a sharp rise in releases is observed, up 10% over the previous year. This substantial rise reflected a growth in the pool of parole eligible inmates in the burgeoning inmate population who were subsequently released to parole supervision. The year 1978 saw a temporary drop in releases which reflected longer minimum periods of incarceration being set by the Board of Parole and a modest shift toward longer sentences on the part of the courts, both of which lessened the number of paroles. Releases for 1979 and 1980 resumed an upward trend, including high volumes of parole and conditional releases. A decline in 1981 releases reflected both sentencing changes under the Violent Felony Offender Law as well as a change in the manner in which the minimum period of incarceration was determined for a considerable portion of the inmate population. Releases resumed their upward trend in 1982 and 1983, leveling off in 1984, and reaching an all time high of 15,169 in 1986.

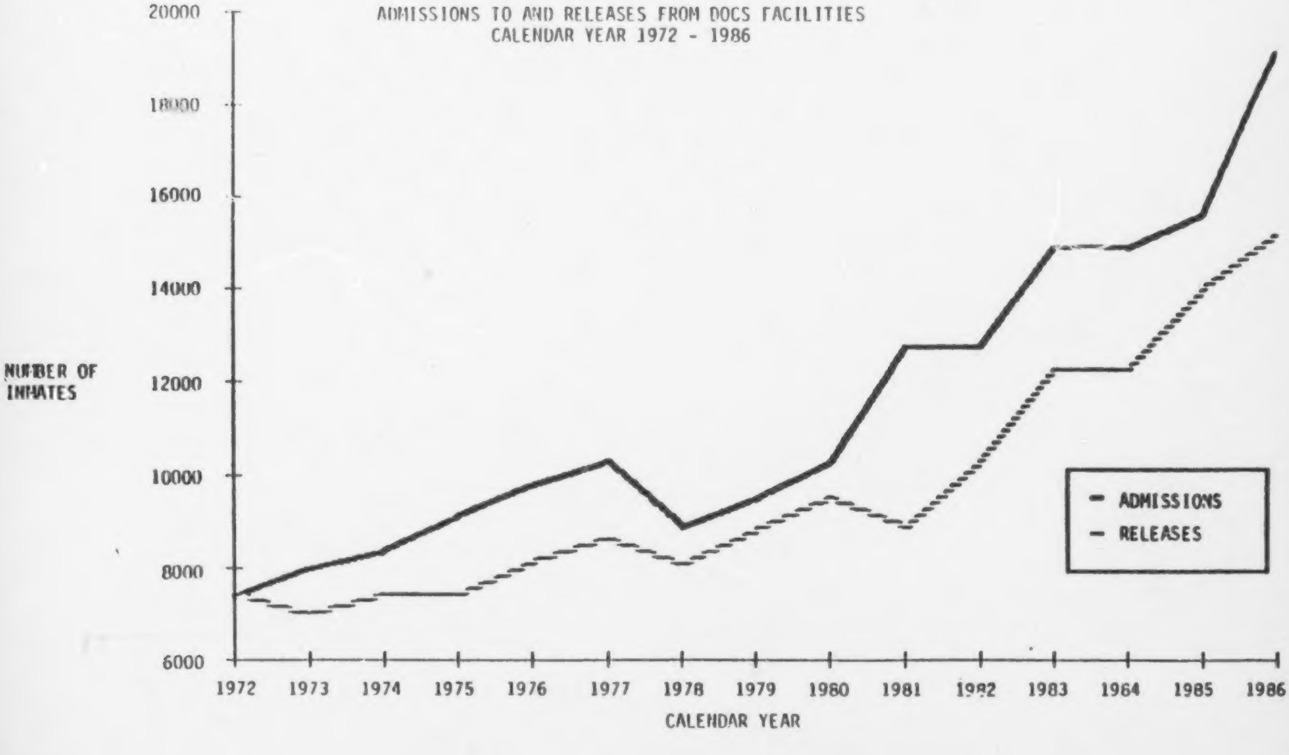
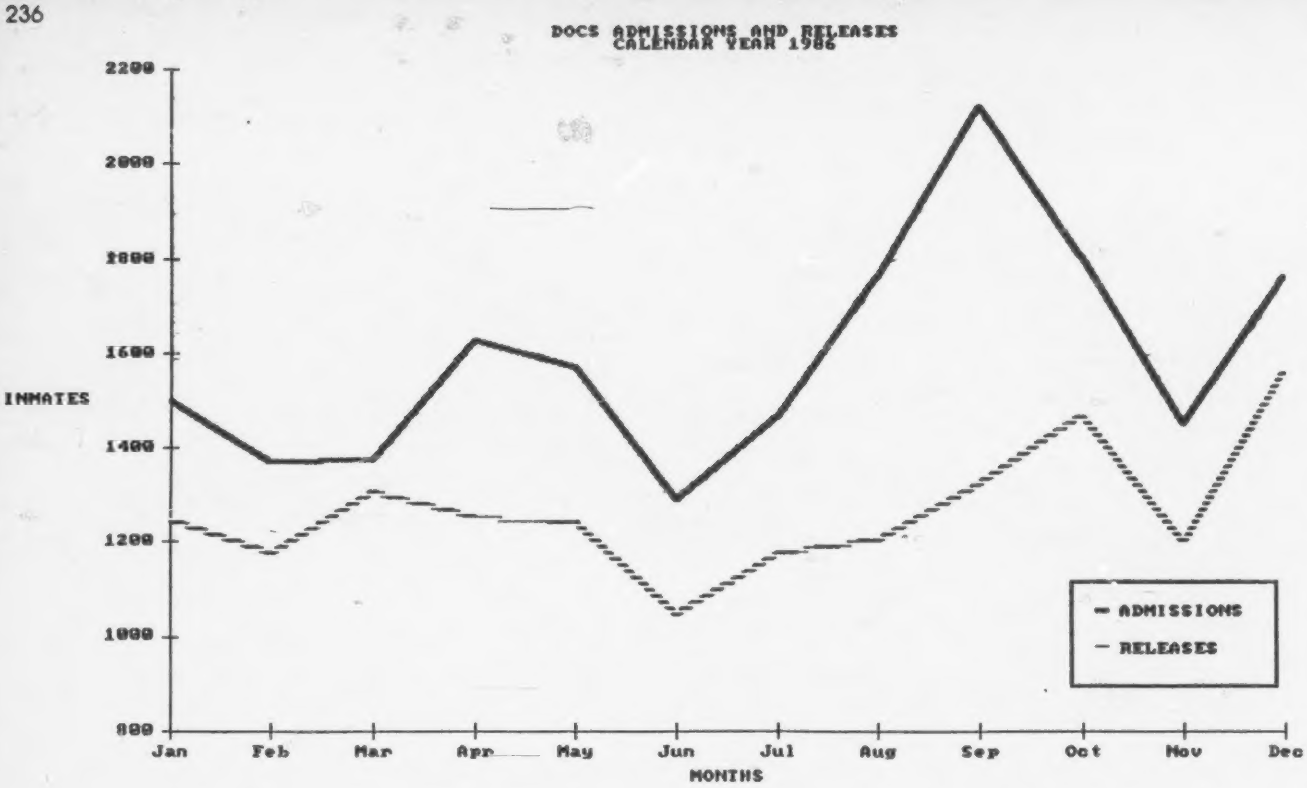
INMATES UNDER CUSTODY
AT CALENDAR YEAR END: 1972 - 1986



ADMISSIONS TO AND RELEASES FROM DOCS FACILITIES
CALENDAR YEAR 1972 - 1986



Reason for Commitment

Of 14,775 offenders committed during 1986 to custody of the Department of Correctional Services, 44.3% (6,538) were sentenced as second felony offenders while 114 or 0.8% were sentenced as persistent felony offenders. A small portion of the commitments, 291 or 2.0% were sentenced as Youthful Offenders.

The majority (52.1% or 7,691) of the 1986 commitments had been convicted of crimes designated in the penal law as Violent Felony Offenses (VFO). Of these VFO commitments, 38.5% (2,965) had been sentenced as second felony offenders. An additional 100 (1.3%) of these VFO commitments had been sentenced as persistent offenders. Commitments for robbery led the VFO group followed by crimes of burglary, homicide, dangerous weapons, sex crimes, and assault.

There were 887 offenders committed for other felonies involving violence or coercion. Commitments for robbery led this group also followed by crimes of homicide, assault and sex crimes. Half (49.9%) of this group had been sentenced as second felony offenders with an additional 0.2% (2) sentenced as persistent felons.

The remaining 5,906 offenders had been committed for various property, drug and other crimes. Drug felonies was the largest category in this group with 3,194 commitments (21.6% of all commitments). The proportion of second felony offenders among drug commitments was 41.9% (1,339) while the proportion of second felony offenders among the property/other crimes was 66.1% (1,793). Next to drugs, burglary was the largest crime in this group followed by grand larceny, stolen property, and forgery.

STATE OF NEW YORK • EXECUTIVE DEPARTMENT
STATE COMMISSION OF CORRECTION

The State Commission of Correction is charged in its legislative mandate, under Article 3 of the Correction Law, with general oversight responsibilities for the prisons, jails, and local police department lockups in the State of New York. The aim of this mandate is the improvement of correctional facility administration and thus, the improvement of conditions which affect the lives, safety, and security of inmates and staff within these facilities.

To fulfill its mandate, the Commission has identified four major goals toward which its oversight activities are directed. These goals are to:

1. Guarantee the just and humane treatment of all persons confined in correctional facilities.
2. Promote a safe and secure correctional environment for inmates and staff.
3. Improve the administration, operations, and programs of facilities and provide direction to the State and local correctional system.
4. Guarantee that the State Commission of Correction carries out its mandate through on-site monitoring and formulation of policy.

The Commission of Correction is part of the Executive Department of State Government. It consists of three members, appointed by the Governor with the advice and consent of the Senate for specific terms of office. The Governor designates one Commissioner to serve as Chairman. The other two Commissioners serve respectively as Chairman of the Medical Review Board and Chairman of the Citizens' Policy and Complaint Review Council. The Chairman is the Executive Officer of the Commission, the Board, and the Council.

The Commission of Correction is legislatively mandated to investigate, review, amend and enforce standards for safe, sanitary, and orderly settings in all correctional facilities in the State of New York (State, New York City, Counties, including all cites, towns and villages), for both staff and inmates. To assist in this effort, the Commission offers technical assistance to facilities and agency administrators through the provision of basic and in-service training for county correctional personnel. The Commission approves all proposed new construction and investigates all inmate deaths. In addition, the Commission serves as a central repository for information on the correctional system in New York State.

The correctional system in New York State is comprised of three major correctional jurisdictions including the Department of Correctional Services, the New York City Department of Correction, and county jails/penitentiaries.

The Department of Correctional Services (DOCS) operates all state correctional facilities. The New York City Department of Correction (NYCDOC) operates all county correctional facilities within the City of

New York. The county jails and penitentiaries are operated by individual county sheriffs/corrections departments. The State Commission of Correction (SCOC) is an oversight agency over all correctional facilities and serves as a central repository for compiling individual county data on a statewide basis.

Individual City, Town and Village Police Department Lockups and the New York City Police Department (which operates New York City Precinct Lockups) also fall under the purview and monitoring function of the State Commission of Correction.

INMATE POPULATIONS

The Commission collected data on county inmate populations by conducting semi-annual telephone surveys from 1981-1984. Beginning in 1985, county correctional facilities began reporting daily population information via the on-line Jails Daily Population Reporting System.

Inmate population counts for both the New York City Department of Correction and the State Department of Correctional Services are obtained from Daily Population Reports produced by both departments.

Table I presents the inmate population across all three correctional jurisdictions from 1981-1986. The table further highlights the percent of increase for both males and females over the six year period.

Chart I illustrates the increase in population across both NYCDOC and county jails and penitentiaries 1981-1986.

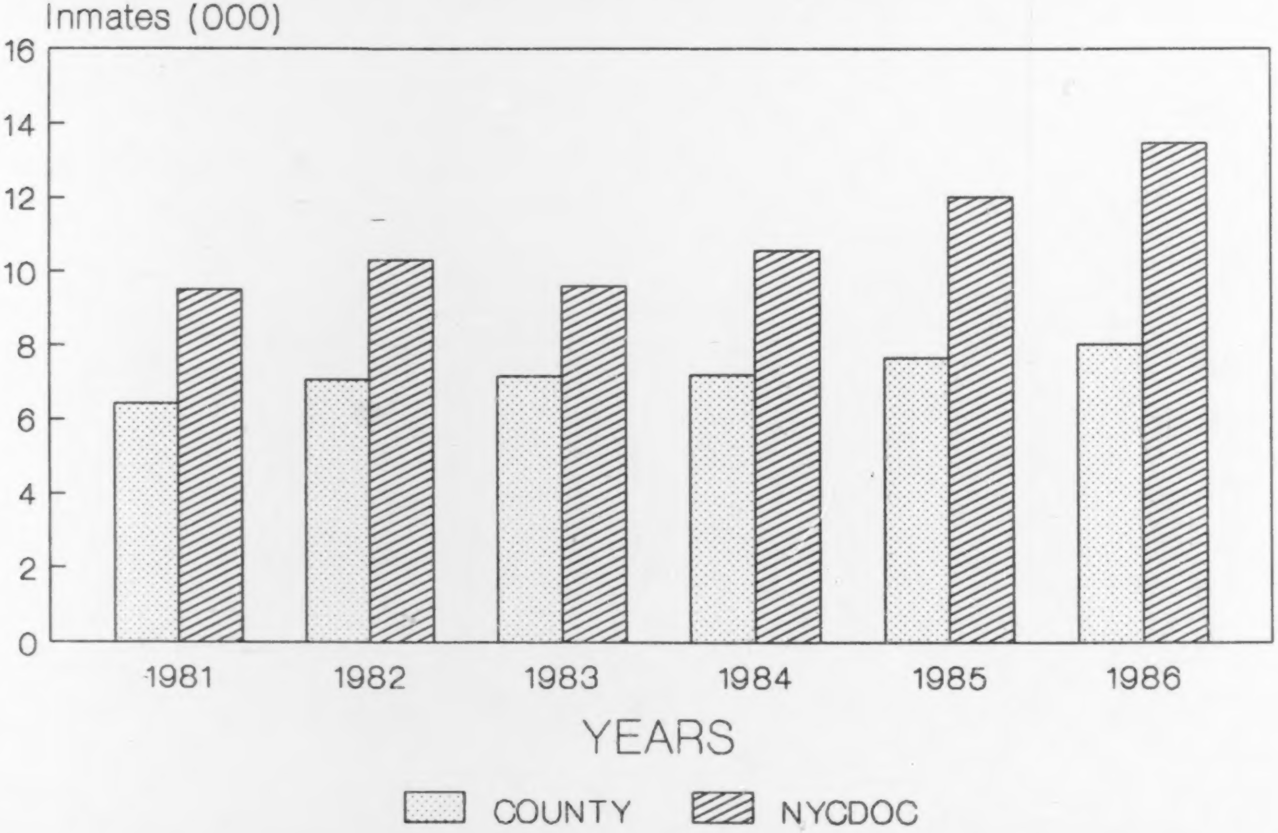
CHART I

INMATE POPULATIONS FOR NEW YORK CITY AND COUNTY CORRECTIONAL FACILITIES



TOTAL ADMISSIONS AND SENTENCED ADMISSIONS FOR COUNTY JAILS AND PENITENTIARIES

County jails and penitentiary admission data were derived from the Statewide Compilation of Data from Sheriffs' Annual Reports (1977-1986). The Commission of Correction compiles this annual report from individual Sheriff and Penitentiary reports submitted by all county correctional facilities.

All data represent the total number of admissions for a given year. An admission does not necessarily represent the number of individuals admitted but rather the process of admitting people. For instance, an unsentenced admission subsequently sentenced within the same year is carried as another admission (sentenced admission).

Tables II - VII represent total admissions data. Chart II illustrates total admissions by the four major reasons for commitment. Tables VIII - X represent sentenced admission data.

TOTAL ADMISSIONS TO CITY, TOWN AND VILLAGE LOCKUPS

Table XVI indicates the total number of admissions reported by police department lockups across New York State 1977-1986. The Commission compiles these data from individual record of detention annual reports received from police department lockups.

Beginning in 1985, the Commission requested a one day population figure from police departments. A one day population represents the number of admissions during the 24 hour period of 12/31. Table XVII reports December 31, 1985 and 1986 population figures.

NEW YORK STATE EXECUTIVE DEPARTMENT

DIVISION FOR YOUTH

During 1986, 2,489 individuals were admitted to residential facilities operated by the New York State Division for Youth. Of these, 1,981 were first admissions having had no prior contact with Division programs; 281 were readmissions from aftercare; and 227 had experienced previous placements with the Division (Table VI).

For those youths adjudicated Juvenile Delinquents, Restrictive Juvenile Delinquents or Juvenile Offenders, the offenses of burglary, robbery, larceny and other thefts accounted for 70.1% of the admissions. Assaults and homicides were responsible for an additional 11.0% of the admissions for this group (Table I).

Among the 2,489 admissions, 12.2% were placed in secure facilities and an additional 20.9% in limited secure facilities. The largest category among admissions was cooperative/voluntary which accounted for 24.9% of the admissions (Table II).

Juvenile Delinquent adjudications accounted for 70.1% of the admissions and Juvenile Offender adjudications an additional 9.9%. Persons In Need of Supervision were responsible for 15.0% of the 1986 admissions (Table III).

Males made up 83.3% of the admissions and females the remaining 16.7% (Table IV). Table V which lists admissions by ethnicity, shows Blacks accounting for 47.9% of the admissions, followed by Whites at 35.6%, and Hispanics at 16.0%.

DIVISION OF PAROLE

DIVISION OF PAROLE 1984-1986

THE BOARD OF PAROLE

During the 1984-85 and 1985-86 fiscal years, the Parole Board conducted approximately 37,000 interviews and/or hearings in State correctional facilities to determine parole eligibility dates for certain inmates, the release readiness of eligible inmates to parole supervision and the re-release of parole violators, as well as other types of administrative hearings.

The number of release interviews conducted by the Parole Board increased from 17,464 in 1984-1985 to 19,149 in 1985-1986, a 10% increase.

The Parole Board granted release to 20,092 inmates during the last two fiscal years with a substantial increase of 21% in 1985-86. Release decisions were granted to 9,565 initial applicants during the two year period (inmates who became eligible for parole release after serving their minimum sentence from April 1, 1984 through March 31, 1986). Reappearance interviews resulted in 8,150 release decisions for inmates who were previously eligible for parole release, but were denied release and became eligible again. Re-release interviews for violators resulted in 2,350 inmates released to the community. Other release interviews resulted in 27 inmates being granted parole. The decisions rendered at the various release interviews are summarized in Table 1 below.

The community protection efforts of the Parole Board are reflected in a comparison of some of the characteristics of inmates granted and denied release at initial interviews. The comparison reveals that inmates who were denied release were more likely to have committed crimes involving the use of a weapon or the occurrence of an injury. Further, those who were denied release had more extensive prior records than inmates granted release. The effectiveness of the Parole Board's screening is demonstrated in greater detail in the table to follow:

PAROLE OPERATIONS

Institutional Parole

The Parole Officer assigned to an institution plays a critical role in the inmate's transition from institutional to community life. The IPO serves in a bridging capacity between the inmate and the community, the inmate and the field parole officer, and the inmate and the Parole Board.

The role of the Parole Officer with an institutional assignment includes an assessment of the needs of each inmate and encourages their participation in programming, during incarceration, which meets these needs. These Parole Officers conduct inmate group counseling sessions and Parole orientation classes for inmates. Additionally, they interview inmates, in advance of their Board release interviews, to gather information which is presented to the Board in summary reports together with recommendations as regards the granting or denial of parole release and the possible conditions of release.

After a parolee has been granted release, the Parole Officer continues to participate in Parole Board release planning through the Community Preparation Program. The Parole Officer provides the link between the institution and the community both through pre-release interviews conducted with inmates and through ongoing communication with the Field Area Office to which the parolee is to be released. These services are provided to both inmates who are released by decision of the Parole Board and to those conditionally released.

Finally, institutionally assigned Parole Officers continue to participate on correctional temporary release committees which grant temporary work release, furloughs and other leaves of absence for good cause to inmates. The Institutional staff is involved in committees within the state's correctional facilities that give support and advice to drug and alcohol programs.

Community Supervision of Parolees

Community supervision is at the heart of the Division's community protection mission. The Parole Officer with a field assignment is located in the community supervising offenders released from state correctional facilities. Community protection requires that Parole Officers adhere to strict supervision standards. Additionally, it is essential to ensure that parolees comply with the terms and conditions of release. When the conditions of release are violated, the Parole Officer must take appropriate action.

Presence in the community allows the Parole Officer to become familiar with the services and resources which the neighborhood contains. Through their familiarity with the surrounding community, the officer can expedite the reintegration of the offender by linking offenders with particular needs to relevant services.

Beginning in FY 85-86, the Division implemented Differential Supervision which was a unique approach to community supervision caseload management. The concept targets resources on parolees with the highest levels of need for surveillance and social services in an attempt to meet the agency's goals of community protection and parolee reintegration. Allocation of these resources is based on a model of risk management under which newly released parolees are placed on Intensive caseloads which require extensive contact standards and reduced caseload size. After 15 months parolees are moved to larger, Regular caseloads when their potential threat to the community and level of service needs have been reduced.

There were 32,822 individuals under community parole supervision during fiscal year 1985-86, as reflected in Table 3 on the following page. This represented an increase of 6% over the previous year's figure of 31,098. Parole Board releases from state correctional facilities increased from 9,005 during fiscal 1984-85 to 10,632 during fiscal 1985-86. Parole Board release practices, as reflected by the median time-served statistics, have remained very consistent over the years.

A/ These individuals were actually released from state prison during the given fiscal year. The total number of releasees should not be confused with the number of inmates granted release by the Parole Board during the same year. Release interviews are done two months in advance, so that the number of actual releases is usually less than the number of inmates granted release by the end of a year. Moreover, inmates granted release in March, which is the close of the fiscal year, would be counted as releasees in the new fiscal year.

B/ This includes cases released to supervision both within state and out-of-state.

C/ Removals include parolees discharged from parole supervision by expiration of maximum sentence, death, Board action, court order and prison returns.

D/ Dynamic population is the cumulative number of parolees under supervision during all or any part of the year.

Outcome of Parole Supervision

The primary goals of the Division of Parole are to assist offenders released from correctional institutions to adjust to community life, and to provide community protection by preventing these individuals from re-engaging in criminal behaviors.

Parole Officers carry out these goals by supervising parolees in the community, coordinating the delivery of available social services, and helping to motivate and guide the parolees towards a more positive lifestyle. However, one must realize that not all persons will abide by their conditions of release. The Division must, therefore, fulfill the goal of community protection by returning a violator to prison.

A violation of parole occurs when an individual under supervision violates the conditions of parole in an important respect. These conditions are agreed to in writing by an inmate upon release from prison to community parole supervision. They stipulate, for example, that if the releasee absconds from supervision or re-engages in criminal activity, his/her parole is subject to revocation. The individual may consequently be returned to prison following a series of due process hearings.

In the 1985-86 period, 13% of all parolees under supervision during the year were returned to prison by the courts for committing new crimes or by the Parole Board for violating the rules of parole (e.g., absconding, or illegal use of drugs). Table 4 provides a more detailed analysis of the parole success rate.

Table 4: Outcome of Parole Supervision

Outcome Measure	1984-1985 A/	1985-1986 B/
Rate of Parolees Returned to Prison with New Court Conviction During Year	4% (N=1,238)	4% (N=1,452)
Rate of Parolees Returned to Prison for Violating Conditions of Parole During Year	8% (N=2,559)	8% (N=2,780)
Total Rate of Prison-Returns During Year	12% (N=3,797)	13% (N=4,232)

A/ Rates computed on basis of dynamic population of 31,098 parolees during April 1, 1984 through March 31, 1985.

B/ Rates computed on basis of dynamic population of 32,822 parolees during April 1, 1985 through March 31, 1986.

In view of the data in Table 4, the parole success rate can be measured in several different ways.

In terms of total number of parolees not returned to prison, the success rate was 88% in 1984-85 and 87% 1985-86. This result is an indication of the Division's overall performance in deterring parolee crime and reincarceration.

From the point of view of enforcing the rules of parole, parolees returned to prison for rule violations cannot really be considered "failures" in the same sense as those who were returned for new criminal convictions. For example, absconding from supervision is less serious than committing a violent offense. But, more importantly, a prison return based on a rule violation decreases the chances of a parolee being a threat to community safety. Given this, the success rate was actually 96% for fiscal year 1984-85 and 1985-86.

Using the most rigorous definition of success, those parolees in an active reporting status, the success for 1984-85 was 76%; in 1985-86 it was 72%. This measure excludes parolees in either an incarcerative or absconder status. It is important to note that not all of these incarcerated or absconder parolees will have their parole revoked or even enter the violation process.

CRIME VICTIMS BOARD

The Crime Victims Board (CVB) was established August 1, 1966 to provide monetary compensation to eligible crime victims. Since 1966 numerous legislative enactments have expanded eligibility and award criteria which has enabled the CVB to provide a wide array of assistance to crime victims and witnesses.

By statute the CVB is mandated as a "payer of last resort". Compensation able to be provided to crime victims, not necessarily physically injured, includes but is not limited to awards: unlimited reimbursed medical expenses including necessary counseling expenses for victims and appropriate family members; unreimbursed loss of earnings/ support up to a weekly maximum of $400 until an aggregate of $30,000 is reached; unreimbursed funeral expenses to a maximum of $2,500; the cost to repair or replace items of essential personal property up to $500; unreimbursed occupational or vocational rehabilitative needs; the cost of residing at and utilizing services of a domestic violence shelter; and lastly, the payment of reasonable attorney's fees up to $1,000.

For fiscal year 1986-87 the CVB received 23,102 claims and expended $11,271,106 exclusively for crime victims. This dramatic increase from the prior fiscal year is attributable to two main factors: 1) the enactment of Chapter 688, Laws of 1985 which expanded eligibility and award criteria; and 2) a New York City wide police notification program which provides information on the existence of the CVB and available compensation benefits.
